Stonybrook Creek Preliminary Surveying

The City of Fridley Engineering Division is working on a flood control mitigation project for Stonybrook Creek. Recent flooding of businesses upstream of East River Road triggered investigation to improve the flooding issues.

In the next few weeks, the City of Fridley Engineering staff will be conducting preliminary survey on your street to collect data to determine feasibility for the project, which may include future construction along your street. We will provide future notice if this would occur.

If you have any questions please contact Brandon Brodhag with the City of Fridley Engineering Division staff at brandon.brodhag@fridleymn.gov or call (763) 238-8086.
